EDUCATION

B.Sc. in Computer Science & Engineering — Oct 2021 – Sept 2026

BRAC University, Dhaka, Bangladesh

Higher Secondary Certificate, Science — Jul 2018 – Apr 2020

BIAM Model School and College, 63 New Eskaton Road, Dhaka 1000

PROJECTS

Jachai — Multi-Modal Web Filtering Browser Extension

• Designed a browser extension to filter the content on the web in multiple modalities, including content scripts to analyse and modify the pages while they are being browsed.
• Implemented AI services in the filtering pipeline to categorize the content of the pages and make filtering decisions in real time.
• Used advanced DOM scripting techniques to locate and manipulate page elements reliably on dynamically loaded pages.
Stack: *JavaScript, WebExtensions API, DOM Scripting, AI API Integration*

GroceryTrackBD — Grocery Supply Chain Platform

• Designed a complete web application, from the placement of orders to approval of orders to delivery, for shopkeepers, product companies and delivery workers in Bangladesh.
• Developed a REST API using Node.js, Express and MongoDB (Mongoose) with 5 core data models (users, products, orders, deliveries, notifications) and respective endpoints for auth, orders, delivery and analytics.
• Implemented platform security using JWT, bcrypt password hashing, express-validator for input validation and role-based access control for 3 user roles.
• Introduced email (Nodemailer) and SMS (Twilio) notifications, area-based analytics and delivery-proof photo uploads; built the React 18 + TypeScript frontend, featuring React Query and Tailwind CSS, and deployed it to Vercel.
Stack: *React, TypeScript, Node.js, Express.js, MongoDB, Mongoose, JWT, Tailwind CSS, React Query, Twilio, Nodemailer*

Event Management System — Full-Stack Web Application

• Created a full stack event management web application using Laravel (PHP) with the MVC architecture and using Laravel's routing, controllers and Eloquent ORM.
• Managed and modelled the relational database schema using Laravel migrations.
• Developed a user-friendly interface using Tailwind CSS.
• Set up PHPUnit test suite for automated testing of application behaviours.
Stack: *PHP, Laravel, Eloquent ORM, Tailwind CSS, PHPUnit*

Travel Tracker — Trip Planning & Passport-Stamp Web App

• Building a MERN application in TypeScript, with a React client, an Express API and a common package of types to be shared between the client and the API.
• Created a custom UI design system using CSS-variable colour tokens, dark-mode theme and a reusable component library (Button, Card, Stamp) styled using Tailwind CSS.
• Developed 5 Tab Application Shell with React Router and Motion animation.
• Configure the engineering process using ESLint, Prettier, type-checking and GitHub Actions CI checks.
Stack: React, TypeScript, Vite, Tailwind CSS, React Router, Express.js, Node.js, MongoDB, GitHub Actions

SKILLS

Languages: JavaScript, TypeScript, PHP, HTML5, CSS3
Frontend: React, React Router, React Query, Tailwind CSS, Motion, Responsive Design, Design Systems
Backend & APIs: Node.js, Express.js, Laravel, REST API Design, JWT Authentication, Role-Based Access Control
Databases: MongoDB, Mongoose, Eloquent ORM, Schema Design
Browser & AI: Browser Extensions (WebExtensions API), DOM Scripting, AI API Integration
Tools & Testing: Git, GitHub, GitHub Actions (CI), ESLint, Prettier, PHPUnit, Vercel

WORK EXPERIENCE

Oct 2025 – Present

Private Tutor — Private Tuition
• Taught secondary school students on a one to one basis, helping them to develop their knowledge and achievement.
• Planned lessons to suit each pupil's pace and gaps in their learning and adapted explanations until they were clear.
• Deconstructed complex concepts and ideas into simple steps, while developing the communication and time-management skills required for team work.

HOBBIES

Football, Badminton
